at Washington, D. C.

INTRODUCTION.

In presenting this book to the trade, will say that we consider it to be the most practical work of its kind ever published, and therefor it will be found to be of great convenience and vast benefit to every cheesemaker and to all those upon whom devolves the computation of the patrons accounts.

It shows at a glance the value of from 1 to 4000 pounds of milk, at from 30 cents up to $1,30, by steps of ¼ of a cent, thus giving the value of any given number of pound of milk in four hundred diffirent prices.

No mathematical calculation is necessary, as the tables are so arranged that any person, by looking at the head of page to find the given price, and at the side for the number of pounds wanted, can tell the value of same at once.

These tables are accurate and can be relied upon, and will give universal satisfaction as they preclude all possibility of mistakes, besides doing away with the necessity of computing the value of the same number of pounds of milk a dozen or a hundred times in each season as is very often the case under the old process.
